Select, Don’t Settle!

For over 45 years the Superior Signal Company has provided quality products to the fire service industry. Only Superior Signal offers you a choice of excellent products designed for specific training applications. We are the only source for all types of training smoke: disposable high volume generators, or rugged smoke machines.

The training process involves a progressive series of exercises based on the trainee’s level of competence, and related to the goal that all members can perform the assigned fire ground duties with minimum risk. Training exercises should be conducted according to fire ground S.O.P.’S. Remember, the psychology of learning uses the process of repetitive acts to reinforce performance of learned behavior. Consider the conditioned responses you are developing and select the atmospheric characteristics required to fulfill your training objectives.

Close to real conditions, where full dress and self-contained breathing apparatus are used, can be created utilizing inexpensive disposable smoke generators. These throwaway items provide huge volumes of pungent white smoke, and are a highly effective means of simulating a realistic disaster scene.

A non-irritating smoke for obscuring vision in confined spaces is provided by our popular ST-10 smoke machine.
Classic Disposable Smoke Generators

- Versatile; Training officers can place these randomly into 55 gallon drums to develop controlled “unexpected” occurrences.
- No power source required.
- Produces huge volumes of pungent white smoke.
- Excellent for creating realistic disaster scenes such as large industrial disasters, hazmat incidents, and aircraft crash simulation.
- Total obscuring power (TOP) ten times that of crude oil.
- Persistent smoke can be seen for miles.

The Superior™ Smoke #3C generates a big 40,000 cubic feet of whitish gray smoke while burning from two to three minutes. Our most popular item for firemen training. Size 1 1/2” x 5”. Mailable. Shipping weight 5lbs. per dozen.

The Superior™ Smoke #W3C generates approximately 40,000 cubic feet of whitish gray smoke in two to three minutes; double wicked with quick clips furnished for multiple units extending smoke generating time.

The Superior™ Smoke #1A generates 4000 cubic feet of smoke in thirty seconds. Size 1 1/2” x 1 1/2”. Mailable. Shipping weight 2 lbs. per dozen.

The Superior™ Smoke #2B generates 8000 cubic feet of smoke in one minute. Size 1 1/2” x 2”. Mailable. Shipping weight 2 lbs. per dozen.

The Superior™ method of generating smoke by chemical reaction provides smokey atmospheres for training exercises involving the use of self-contained breathing apparatus. The smoke has excellent obscuring power and pungent odor revealing inadequate protection. Superior™ Smoke items contain no explosive materials and are the only devices of this nature acceptable in the mails. It has a T.O.P (total obscuring power) of 2100. T.O.P. is the scientific method of determining the relative efficiency of smoke generated by a given unit of smoke composition. By comparison, Superior™ Smoke has a T.O.P. ten times greater than crude oil. More smoke, exclusive features, plus low prices make Superior™ Smoke products your best buy.

Superior™ Smoke Grenades are engineered for use where an instantaneous and exceptionally large volume of smoke is required. They are solidly constructed with a dependable built-in-pull-wire ignitor and warranted for three years.

Superior™ Smoke Grenade generates 115,000 cubic feet of smoke during 2-3 minutes burning time. Size 2” x 5”; weight 1lb.

Superior™ Professional Smoke Grenade generates 130,000 cubic feet of smoke while burning 2-3 minutes, size 2 1/2” x 5” weight 1 lb.

The Superior™ Professional White Smoke Pot is activated by a sure fire pull-wire ignitor. It generates over 500,000 cubic feet of dense white smoke, sufficient to simulate a city block sized disaster area, during a five to six minute burning time. The ignitor and smoke generating materials are enclosed in a sturdy sealed metal container, with an easily removed U-Press-it closure, protecting them from atmospheric changes, the principal cause of ignition failures and unsatisfactory performance. Warranted for three years. 6 3/4” x 4”, shipping weight 5 lbs.

Handle carefully. Avoid exposure to smoke without respiratory protection. Do not use in confined areas without self contained breathing mask. Superior Smoke Pots and Grenades are for outdoor use only.

CAUTION: Handle with care. All smoke including Superior™ can irritate breathing passages without respiratory protection. Before use, read and understand MSDS.
Model ST-10 Smoke Machine

Superior Signal Company Inc. has provided training smoke to the fire fighting industry for over 45 years! We know what you need in a smoke machine, and the ST-10 is it! With a powerful 1500 watt heating core, and reliable high pressure piston pump, this machine delivers an impressive output of 4800cfm, at a price affordable for any department. The ST-10 will quickly fill your training area with dense, persistent, non-irritating smoke with excellent obscuring power.

The ST-10 comes standard with a 10 meter wired remote control which makes operation easy. No more searching for controls in a smoke filled room. This hand held remote features a selection for manual, or self timed (unmanned) operation.

Simply set the dial to control flow rate, duration of smoke blasts, and interval between blasts. The ST-10 will fill the area with smoke at a steady constant rate, therefore reducing the chances of over concentration and residues.

FEATURES
- Adjustable Flow Rate
- Quick Warm-up Time
- Reliable High Pressure Pump
- Extremely Easy to Use
- Thermal Cut Off, Prevents “Wet Smoke”
- Non-Irritating Smoke*
- High Output, Low Cost
- Manual and Auto Timer

SPECIFICATIONS
- Output: 4800 CFM
- 1500 watt heater
- Weight: 30 lbs
- Fluid Capacity: 1 Gallon
- Warm-up Time: Approx. 10 -15 min.
- Conforms to ANSI/UL Std. 998,
- Certified to CSA Std. C22.2 No. 104
- Power: 110/120v 60Hz

ST-10 Fluid is compatible with some competitive machines!

* May be irritating to those persons with allergenic sensitivity.
